Saskatchewan Milk Control Board Update

May 17, 2010

CHAIRMAN'S MESSAGE – BLAINE McLEOD

The summer-like weather is upon us as I write this update and our thoughts turn to the crop season. It appears that moisture conditions are good across the province. It has been a long time since that could be said and I trust that as we look back on this growing season, that weather will not have been a limiting factor. May I wish each of you a safe and productive spring and summer.

I want to take a few moments to update you on some recent events in our industry. First of all I would like to thank each one who attended the spring district meetings. Obviously the topic of conversation was very important to us all and the opportunity to be heard was a very necessary component of the process. The whole issue of what is an appropriate herd size, and the related issue of risk management, dominated the discussion. The Hearing that was held on April 13th and 14th addressed the proposed transfers that would create one very large dairy in the Saskatoon district. The decision of your board, at the end of the Hearing, was that this proposed transfer could go ahead and would be granted an exemption from the developing policy. It was also noted that there is a need for a cap on maximum quota holdings and that policy will be announced in the very near future. We have listened to the input from the producer body and I believe that the soon to be announced policy will suit the needs of our industry both now and into the foreseeable future.

I would also like to speak regarding the merger of our two governing bodies. The birth of the Saskatchewan Milk Marketing Board is now a reality. The initial regulations establishing the Interim Board have been passed by government and the new entity now has a legal footing. The final regulations are not complete and there is much work to be done. Your Board continues to work through some very difficult issues to ensure that what was promised in the plan will be delivered. The Agri-Food Council and the Minister of Agriculture approved the plan that was developed by our industry in accordance with their rules and timelines. It is everyone's obligation to deliver the plan in the manner that was voted on by producers. To do any less would be contrary to the Government's process and an abdication of our responsibilities. There are scheduled meetings in the next days where we will continue to push for the full and complete implementation of the plan, including all approved authorities. We will continue to report on the development of your new organization. If you have any further questions please do not hesitate to call. You may speak to any Interim Board Director. Thank you for taking the time to read this update.

INCENTIVE DAYS – JUNE & JULY, 2010

The Milk Control Board will be issuing incentive days for the months of June and July. One (1) incentive day will be issued in June, and two (2) incentive days will be issued in July.

Incentive day credits are temporary quota allocations that are intended to stimulate production for specific months when the Board feels more production is required. Incentive day credits are used after a producer's monthly quota allocation is filled. If you do not use the incentive day credits in the month they are available, you lose the opportunity to produce them. **Incentive day credits cannot be transferred to other producers and they do not affect a producer's cumulative credit position.**

Depending on the provinces' cumulative position in the upcoming months additional incentive day credits ***may*** be made available in future months.

June, 2010 - One (1) incentive day available
A producer who has a daily quota of 100 kgs. = 100 incentive credits

Incentive day used

Actual Shipments	Monthly Allocation	Incentive Credits Available	Incentive Credits Used	Monthly Over/(Under)
3,500	3,000	100	100	400

Incentive day partial use

Actual Shipments	Monthly Allocation	Incentive Credits Available	Incentive Credits Used	Monthly Over/(Under)
3,050	3,000	100	50	0

Incentive day not used

Actual Shipments	Monthly Allocation	Incentive Credits Available	Incentive Credits Used	Monthly Over/(Under)
2,800	3,000	100	0	(200)

Please contact the Board office if you require further clarification regarding production incentive days.

QUOTA EXCHANGE

The market-clearing price established for the May, 2010 Quota Exchange was **$31,100.00.** The results of the Quota Exchange are outlined in the following Table.

The next Quota Exchange will be held on June 15, 2010. All offers to sell and bids to purchase quota through the Quota Exchange must be received at the Board office by midnight, June 6, 2010. The Board recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

Just a reminder to producers that when making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the

market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange.

The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase.

HOW TO BUY OR SELL DAILY QUOTA ON THE EXCHANGE

With the change from annual quota to a daily quota, there are some changes to submitting bids on the Quota Exchange. There are two steps to convert your bid, whether buying or selling, from annual to daily quota. For the purposes of this example, an annual quota bid of 3,000 kgs of butterfat at $60.00/kg will be converted to a daily quota bid.

Step 1: Convert annual kgs of butterfat to daily kgs of butterfat.

3,000 kgs ÷ 365 = 8.22 kgs/day (Daily Quota is calculated up to 2 decimal places)

Step 2: Convert bid to dollars per kg per day

$60 × 365 = $21,900.00

Therefore, the bid, whether buying or selling would be:

- 8.22 kgs/day at the price of $21,900 to obtain an equivalent bid of 3,000 kgs at $60/kg under the annual quota policy.

The monetary value of this bid would be:

8.22 kgs/day × $21,900/kg = $180,018

PRODUCER TRANSFER CREDIT LIST

The Board will be maintaining a Producer Transfer Credit list to assist producers in transferring credits (in or out) with another producer.

Producers wanting to transfer credits (in or out) with another producer can contact the Board to have their name added to the Board's Producer Transfer Credit List. This list is posted on the Board website and is also available by weekly email or upon request by fax, email, or regular mail. The Board will also enclose the list with the monthly newsletter.

The transfer credit list will be updated on a daily basis as requests come into the office. Postings will be dated and kept on the list for two months. It is up to the producer to contact the Board to repost their name after the two month period is up, or to have their name removed from the list if it is no longer required. Producers may contact the Board at 787-5319 or 787-6457 for additional assistance.

Continuous Quota FAQs

Following the round of Continuous Daily Quota Seminars, a list has been compiled of the questions most frequently asked by producers.

Will my credit position change on August 1, 2010 if I was in a pre-fill position with 4m dollars being withheld and do not achieve a cumulative credit position of 0 days or less by July 31, 2010, thereby forfeiting those 4m dollars?

No, your credit position will not change; you will still be responsible for dealing with your positive credits.

What is the deadline for transferring negative credits if I exit the industry?

Producers who exit the industry will have the opportunity to transfer negative credits to other producers for a period of two months.

For example, if a producer exits the industry effective September 1st, that producer will have the opportunity to transfer any negative credits for the months of September and October. Any credits not transferred after that date will be lost. The deadline for transferring credits is the 20th of each month, therefore the deadline to transfer credits to another producer would be October 20th.

If my TPQ is reduced, either through a quota sale or quota reduction, and this causes me to exceed the +10 days cumulative position, what happens?

If a producer exceeds the +10 day limit as a direct result of a reduction in TPQ, that producer's TPQ will be capped at +10 days. No penalty will be assigned for exceeding the +10 day limit under this circumstance; however overproduction in the future will be penalized.

Are positive credit transfers permitted in farm splits?

No, positive credits cannot be transferred to another farm under any circumstance.

What happens to my negative credits that I have accumulated if I exit the industry (sell out)? What if I stop shipping milk before the quota transfer date?

When selling out, your daily quota (TPQ) is transferred to the purchasing producer using the Quota Transfer Form. Accumulated negative transfer credits are transferred using the Transfer Credit Form and may or may not be transferred to the producer purchasing your daily quota depending on the deal that you have struck. The Board will calculate the final available negative credits accumulated.

Should a producer cease shipments at least one full calendar month prior to the quota transfer date, that producer may transfer 95% of the estimated negative transfer credits that would accumulate in the month that no milk was shipped for an effective date of the first of the same month. The final available negative credits, the remaining 5%, that would have accumulated prior to the transfer date will be calculated by the Board and be available for transfer.

For example, if a producer ceases shipping milk on August 31st with an effective sale date of October 1st, 95% of the estimated negative credits that will be accumulated in the month of September may be transferred for a September 1st effective date. In early October, the Board will calculate the final negative credit total and those negative credits may be transferred to another producer at that time.

If I ship less than 100 % of my quota as of July 31, 2009, will I start in a negative credit position August 1, 2009?

No, producers shipping 100% or less as of July 31, 2009, will start at zero credits August 1, 2009. This would be the case whether Saskatchewan moved to Continuous Daily Quota or not.

If I ship greater than100 % of my quota as of July 31, 2009 how will I start August 1, 2009?

Saskatchewan will be in a pre-fill position as of August 1, 2009. Producers shipping greater than 100 % of their quota as of July 31, 2009 will be in pre-fill and will start with positive kgs of butterfat credits or positive credit days equivalent to their pro-rata portion of the over quota. This would be the case whether Saskatchewan moved to Continuous Daily Quota or not.

If I am in prefill August 1, 2009 how can I get my 4M dollars back?

The following condition must be met to get back the 4M dollars held by the Board:

When July 31, 2010 production is reconciled, a producer must be at or below zero cumulative kgs of butterfat. If a producer is still at positive credits or positive credit days, **no 4M dollars will be refunded.** These dollars will be added into the September, 2010 month-end pool and paid out October 15, 2010. All producers will share in these dollars.

It does not matter if a producer is at or below zero kgs of butterfat during any of the months throughout the year. **The day of reconciliation is based on August 1, 2009 to July 31, 2010 production.**

If Saskatchewan had been in a prefill situation before the change to Continuous Daily Quota this would also have been the case.

What can I do to get down to zero positive credits or credit days?

Producers have a number of options they can use to get their quota position back in line. They can transfer in credits, buy quota, decrease the number of cows being milked, etc.

What happens to my 4M dollars if I leave the industry before July 31, 2010?

If a producer who is in pre-fill leaves the industry before July 31, 2010, **they will forfeit all 4M dollars held by the Board.** The 4M dollars will go into the September 2010 month-end pool and all producers will share in those dollars.

The 4M Dollars held by the Board will only be refunded back to producers in prefill who meet the zero or less cumulative position for the July 31, 2010 reconciliation.

What happens if I start August 1, 2009 with at or greater than +10 days?

A producer starting in pre-fill at or greater than +10 days will only receive payment for their in-quota production.

For example: 100 kgs of butterfat is the producers' daily quota. The pickups are based on 30 days, so the producers' in-quota monthly allocation is 3,000 kgs of butterfat. The producer ships 3,500 kgs of butterfat. The producer will receive payment for 3,000 kgs of butterfat and 500 kgs of butterfat will be over quota (over the +10 day limit). There is no 4M as of August 1, 2009. The value of that milk will be put back into the month-end pool and all producers will receive a higher blend price.

The producer will never have the ability to recoup that over quota production and all deductions for the over quota milk will be applied MCB fees, DFS levy, and haulage.

Any producer whether in pre-fill or not that exceeds the +10 credit days will receive ***ZERO PAYMENT*** and all deductions for the over quota milk will be applied, MCB fees, DFS levy and haulage.

What happens if I start August 1, 2009 with some pre-fill days but not exceeding the +10 day limit?

A producer starting August 1, 2009 with some pre-fill days but not exceeding the +10 day limit still has flexibility before they are over quota.

For example: A producer starting in pre-fill at +7 days has 3 days flexibility before they are over quota. If 100 kgs of butterfat is your daily quota, and your pickups are based on 30 days, then your in-quota monthly allocation is 3,000 kgs of butterfat. If you ship 3,200 kgs of butterfat, you will receive payment for 3,000 kgs of butterfat based on in-quota, 200 kgs of butterfat will also receive full payment because 3 days or 300 kgs of butterfat of flexibility still exists. You would have 1credit day remaining or put another way you would be at +9 credit days.

When can I get transfer credits?

There will be no transfer credits available in August 2009, because no producer will have accumulated any. The earliest a producer will be able to find credits will be September 2009.

What is the deadline for transfer credits?

The transfer credit deadline for any month is by midnight of the 20th. For example any transfer credit forms in the Board Office on or before midnight of October 20th will be effective October 1st.

Where can I find producers wanting to transfer credits?

The Board will maintain a web page with producers wanting to transfer credits in or out. It will be updated on a daily basis as requests come into the office. Producers who do not have internet access can call the Board and have the information faxed to them.

Producers wanting their name posted on the web page can contact the Board. Postings will be dated and kept on the website for 2 months. It is up to the producer to have their name reposted after the 2 months or removed if they fill their requirement before the 2 month period is up.

What is the maximum amount of transfer credits that I can transfer out in a month?

The maximum transfer credits a producer can transfer out in a month are equal to what the producer's cumulative under position was in the previous month. You can only transfer out to a cumulative position of zero credits.

The maximum a producer can transfer out in a rolling 12 month period is 15%.

What is the maximum amount of transfer credits that I can transfer in?

There is no limit to the amount of credits that can be transferred in a rolling 12 month period. The only limit when transferring in credits would be to not drop below the -30 credit day limit at the end of each month or you will have lost the opportunity to carry-forward those credits to produce that milk in the future.

When will we know if Incentive Day Credits are available?

The Board will do its best to give producers as much notice as possible when incentive day credits are going to be available.

If the province is over quota as of July 31, 2010 will I still get all my 4M dollars back if I am at zero credits or credit days?

Yes.
